talks by and with technology leaders and innovators

ACM Sacramento Chapter - Internet of Things Program Distinguished Speaker Series

<http://sacramento.acm.org>

ACM Sacramento Chapter presents

On: June 25, 2015 6:00 pm. (Networking: 5:30pm – 6pm)

At : Dept. of Technology, County of Sacramento

799 G Street, Room 221, Sacramento, CA 95814

Contact: Harish Jain (916) 271-2493

Members: Free

Non-Members: \$10 per person (till seats available)

(Membership: \$30 Annually)

Registration

Data, Analytics, and the Dawn of the Cognitive Era of Computing.

Distinguished speaker **Laura Haas**

Laura Haas is an IBM Fellow and the director of IBM Research's Accelerated Discovery Lab. She was the director of computer science at IBM Almaden Research Center from 2005-2011, and had worldwide responsibility for IBM Research's exploratory science program from 2009 through 2013. Previously, she was senior manager for Information Integration Solutions Architecture and Development in IBM's Software Group. Dr. Haas was one of the founders of Information Integration Solutions, which today includes InfoSphere Information Server and a suite of products that can integrate both structured and unstructured data via federation and materialization.

Abstract

We are poised on the brink of a new era of computing, one in which computers will increasingly partner with people to improve our lives and enhance our ability to solve complex problems. These new systems will feed on data and leverage a diverse set of analytic tools and strategies, constantly learning. In this talk, we'll introduce cognitive computing...

ACM Sacramento Chapter Officers:

Chairperson - Dr. Harsh Verma

Vice-Chairperson – Dr. Anne-Louise G Radimsky

Treasurer - Michael Brady

Co-Chair, Semantic Web and Webmaster - Savita Farooqui

Event Coordinator – Harish Jain
